

DIRO AI Community

With the DIRO AI Community, we are pursuing a central goal: to provide you, as DIRO members, with targeted support in **integrating artificial intelligence into your everyday law firm work** and promoting your AI expertise.

Why does the AI Community exist?

AI is changing how we work, what we need to know, and what we need from each other. We created the AI Community not to observe this change, but to shape it.

The goal is to make **the entire law firm team proficient in using AI**. In doing so, we combine practical knowledge transfer with a targeted cultural change: employees are involved from the outset, reservations are broken down, and an **open, trusting learning atmosphere is created**—regardless of prior technical knowledge or previous points of contact.

Knowledge transfer through DIRO:

DIRO AG regularly **offers webinars and open consultation hours** that shed light on questions relating to AI in a practical manner. Together with DIRO AG, members develop practical use cases and best practices in moderated groups. In addition, members have access to a comprehensive knowledge database that is continuously updated.

Collegial exchange on equal terms:

A key component is **professional dialogue** among colleagues—**across law firm boundaries**. DIRO expressly promotes this exchange and invites active participation through discussions during consultation hours and informal knowledge transfer from members' own practice. This form of collaboration is autonomous and independent—it thrives on the openness, trust, and curiosity of its members.

Law firm with ≤ 5 professionals

1.200 € / Jahr

Applicable to all law firms with ≤ 5 professionals

Regardless of the number of AI licensees

Law firm with > 5 professionals

1.500 € / Jahr

Applicable to all law firms with > 5 professionals

Regardless of the number of AI licensees

Would you like to join us?

Then register now and become part of the DIRO AI community, which shares knowledge and shapes change together. To register, simply send an email to wipf@diro.eu.

Would you like to get actively involved?

If you would like to share your practical experiences with AI in the community or have questions and suggestions regarding use cases, please feel free to contact us. We appreciate your initiative.
